INTRODUCTION

Selected References on Environmental Quality as it Relates to Health is a product of MEDLARS (Medical Literature Analysis and Retrieval System), the National Library of Medicine's computer-based citation retrieval system that is used to compile and produce its publications. *Index Medicus* encompasses the literature of biomedicine broadly; other bibliographies cover special subject areas.

This bibliography cites selected articles from about 3,000 biomedical journals. Each monthly issue includes references cited in the monthly *Index Medicus* for the corresponding month. In addition, proceedings of selected congresses and symposia are indexed, as well as various multi-authored monographs. Citations to these works are also included in this bibliography.

The citations in *Selected References* are arranged under subject headings which represent the central concepts in the papers. These subject headings are selected from NLM's controlled vocabulary *Medical Subject Headings (MeSH)** by trained indexers. The indexer selects the most specific applicable subject headings. For example, a paper on dieldrin would appear under DIELDRIN, not under the broader INSECTICIDES. INSECTICIDES and other more general headings are used for general works and for those on more specific concepts for which there are no individual headings in *MeSH*. If the desired references are not found under a specific term, the user should seek a more general term. (A convenient way to identify the appropriate general term is to browse in the hierachic listing of *MeSH*). If the user wishes to search exhaustively for all citations on a general subject, he should scan the citations under both the general heading and all the more specific *MeSH* headings. For example, for citations on air pollution, one might scan AIR POLLUTION, and additionally, DUST, SMOG, AUTOMOBILE EXHAUST, SMOKE, and AIR POLLUTION, RADIOACTIVE. (Terms followed by an asterisk [*] in the hierachic listing of *MeSH* are used for machine retrieval from the MEDLARS system; they do not appear as subject headings in *Index Medicus*, but may in this bibliography.)

Subheadings are used to indicate a particular aspect of the subject. Subheadings appear in small capital letters indented under the subject headings. Under each subheading, citations are listed alphabetically by journal title abbreviation.

* Medical Subject Headings, published as Part 2 of the January *Index Medicus* (available separately from Superintendent of Documents).

Each journal article citation contains the following elements in order: title of the article in English (brackets indicate translated title); author (senior author if more than one); journal title abbreviation; volume number; issue, part or supplement; inclusive pagination; date of issue; and an abbreviation indicating the language of the article if other than English. Foreign language articles containing an English abstract are so indicated. Review articles list the number of references in parentheses.

Each citation to a monographic chapter or paper contains the following elements, in order: original English title of the chapter, or English translation thereof; inclusive pagination; first author (if more than one) or sole author; the word "In," followed by the name of the editor or compiler of the monograph; title of the monograph; place of publication; publisher; date of publication; NLM call number; and an abbreviation indicating the language of the piece if other than English.

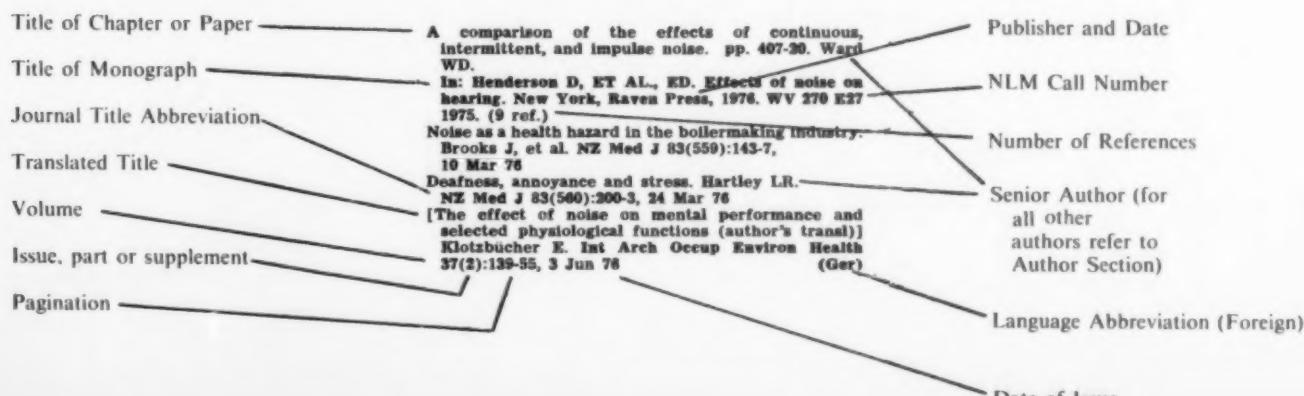

Each citation is also listed in a separate Author Section under the name of the senior or sole author, with cross references from the other authors.

TOXICITY

Thickening agents. A. Celluloses. pp. 297-315.
In: Toxicological evaluation of some food additives

including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Emulsifiers. Cholic and desoxycholic acid and their salts. pp. 217-9.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Emulsifiers. Mixed taurine, acetic and fatty acid esters of glycerol. pp. 236-7.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Emulsifiers. Polyoxyethylene (8) and polyoxyethylene (40) stearates. pp. 264-9.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Food additives. Miscellaneous: L-glutamic acid and its ammonium, calcium, monosodium and potassium salts. pp. 434-60.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Food additives. Miscellaneous: stearoyl lauric acid, calcium and sodium salts. pp. 505-11.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Food additives. Miscellaneous: polyvinyl pyrrolidone. pp. 486-90.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Emulsifiers. Sorbitan monoesters of palmitic and stearic acids and triesters of stearic acid. pp. 278-83.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Food additives. Miscellaneous: calcium acetate, chloride, gluconate and sulfate. pp. 415-6.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Emulsifiers. Esters of glycerol and thermally oxidized soybean fatty acids. pp. 225-8.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Food additives. Miscellaneous: sorbitol. pp. 498-504.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Emulsifiers. Acetic and fatty acid esters of glycerol. pp. 210-3.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Food additives. Miscellaneous: tartaric acid and its potassium, potassium-sodium and sodium salts. pp. 512-4.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Anticaking agents. Salts of myristic, palmitic, and stearic acids. pp. 19-30.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Food additives. Miscellaneous: food-grade mineral oil. pp. 417-33

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Food additives. Miscellaneous: 1,2-propylene glycol. pp. 491-7.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Emulsifiers. Hydroxylated lecithin. pp. 229-30.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Anticaking agents. Calcium, potassium, sodium ferrocyanide. pp. 15-6.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Food additives. Miscellaneous: lactic acid and its ammonium, calcium, potassium, and sodium salts. pp. 481-5.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Emulsifiers. Mono- and diglycerides. pp. 238-40.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Anticaking agents. Silicon dioxide and certain silicates. pp. 21-30.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Thickening agents. D. Others: polysaccharides. pp. 379-414.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Emulsifiers. Mono- and diglycerides. pp. 238-40.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Emulsifiers. Polyoxyethylene (20) sorbitan monoesters of lauric, oleic, palmitic and stearic acid and triester of stearic acid. pp. 254-63.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Thickening agents. B. Vegetable gums. pp. 316-28.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Emulsifiers. Lecithin. pp. 234-5.

In: Toxicological evaluation of some food additives including anticaking agents, antimicrobials, antioxidants, emulsifiers and thickening agents. Geneva, World Health Organization, 1974. W1 W14H no.5 1974.

Emulsifiers. Polyglycerol esters of interesterified ricinoleic acid. pp. 246-53.
